

Refinery And Petrochemical Integrated Development - “RAPID” PROJECT

“DEXTRANS WORLDWIDE CALLED UPON AT THE “ELEVENTH HOUR” TO ARRANGE AN ON-CARRIAGE FROM SINGAPORE TO JOHOR, MALAYSIA – PETRONAS RAPID PROJECT”

Dextrans was called upon to arrange an on-carriage barging from Singapore to Johor, Malaysia from an incoming heavy-lift breakbulk vessel less than 7 days prior to the actual vessel arrival date into Singapore. The total packing list consisted of 53 packages (totalling more than 1850 cubic metres) including 2 heavy lift units of each 118 tons in weight – a “Steam Turbine” and a “Axial Compressor”.

With our years of experience handling hands on project cargoes shipment, excellent network with various equipment owners and good working relationship with the port authorities, we manage to propose an immediate solution meeting the short lead time allocated to move the project cargoes with a detailed plan and presentation to the site discharge office. The on-carriage was done on a public holiday but everything went well. The whole operation was well executed and delivered to the final destination on time and in good condition.
